All About Polar Bears

Read the passage below. Answer the questions to show what you learned.

Polar bears are large mammals that live in the Arctic. A polar bear’s body is built to help them live in the cold. First, their thick fur keeps them warm when it is freezing. And, polar bears have black skin. It helps them get warm in the sun. Finally, they have blubber. Blubber is a thick layer of fat that is like a warm winter coat.

Did you know that polar bears are good swimmers? A polar bear’s paws are huge. Their big paws help them paddle. Polar bears swim slowly, but they can swim for days without stopping. They usually swim to find their favorite food: seals.

What is this passage mostly about?

What is special about polar bears?

How do polar bears find food?
